

Do Permits Expire?

Permits remain active for 6 months, after the 6th month the permit will expire and will no longer be valid. If additional time is needed to complete the project after the expiration date, call our office 210-684-1391 for an extension. An expired permit must be resolved before a new building permit can be issued. To check whether an expired permit exists on your property, call 210-684-1391.
